PROFESSIONAL SUMMARY

Senior Product Manager with 10+ years driving product strategy, roadmap execution, and go-to-market for B2B SaaS platforms, API ecosystems, and AI-powered products serving 1M+ users. End-to-end product lifecycle ownership: customer discovery, PRD authoring, sprint execution, launch, adoption, and iteration. Three independent proof points: 30% revenue growth via partner integrations, >\$2M in risk mitigation, 25% faster time-to-market. Built and shipped AI products (edge AI inference, ML prediction models, AI detection). Engineering background (CS degree, 7 years as Software/Principal Engineer) with hands-on depth in APIs, cloud-native architecture, and data-driven decision-making. MBA (Tech & Analytics), UBC Sauder.

CORE COMPETENCIES

Product Strategy: Product Vision & Roadmap | OKRs & KPIs | PRD / PRFAQ / BRD | Prioritization (RICE, ICE, MoSCoW) | Product-Led Growth (PLG) | 0-to-1 Product Launch | Product-Market Fit | End-to-End Product Lifecycle | Feature Flagging & Experimentation

Discovery & Growth: Customer Discovery | Jobs-to-Be-Done (JTBD) | User Research & Personas | A/B Testing | Funnel Optimization (AAARRR) | HEART Metrics | Cohort Analysis | NPS & CSAT | Go-to-Market (GTM) Strategy | Competitive Analysis | TAM/SAM/SOM

Technical: API Design (REST, GraphQL, OAuth, Webhooks, SDKs) | Developer Experience (DX) | AI/ML Products (LLMs, Edge AI, NLP) | Cloud-Native (AWS, Kubernetes, Terraform) | CI/CD | Microservices | Observability & SLO/SLA | Data Pipelines | SQL | Tableau/Looker

Delivery: Agile / Scrum / Kanban / SAgE | Sprint Planning & Backlog Grooming | Cross-Functional Leadership | Stakeholder & Executive Communication | Jira / Confluence / Figma | GDPR & SOC 2

PROFESSIONAL EXPERIENCE

Vancouver Airport Authority (YVR)

Jun 2025 - Jan 2026

Product Manager -- Fleet Decision Support & Business Continuity Vancouver, Canada

- **Shipped a 0-to-1 data analytics product** from customer discovery through launch -- defined product vision, authored PRDs, ran sprints, and drove adoption in a greenfield environment with no prior system.
- **Cut equipment idle time 50% (20% to 10%)** and prevented ~\$500K in downtime costs by defining KPIs, establishing SLOs, and building observability into the product from day one.
- Led customer discovery with 15+ users (JTBD interviews, workflow observation, persona mapping) to validate product-market fit before writing specs.
- Drove stakeholder alignment across operations, vendors, and executives with shared OKRs, clear ownership, and escalation paths.

Mavenir Systems

Jan 2014 - Feb 2024

Senior Product Manager / Product Owner -- T-Mobile Digits & DevEdge Seattle, USA (2019-2024)

- **Drove ~30% incremental revenue** by identifying underserved enterprise/SMB segments through competitive analysis, simplifying API contracts, and enabling self-serve partner integrations (PLG motion).
- **Cut time-to-market 25% (12 to 9 weeks)** by owning the product roadmap for an API-first platform serving 1M+ users, running sprint planning, and applying RICE prioritization.
- **Avoided >\$2M in SLA penalties** by defining product health metrics (AAARRR funnels, HEART framework, SLOs) and shipping automated rollback guardrails.
- Negotiated cross-company API data-sharing contracts with Samsung, Apple, and Amazon across 40+ device types -- managing competing data models, privacy rules, and release cycles.
- Owned API versioning, backward compatibility, and developer documentation. Ran A/B experiments improving activation and engagement. Presented quarterly business reviews to C-suite.

Principal Engineer / Technical Product Lead -- Rakuten Link (2018-2021)

- **Achieved 99.99% uptime** scaling Kubernetes microservices to millions of sessions. Defined SLOs, managed performance-cost-operability trade-offs.
- **Freed 30% engineering capacity** by building observability/telemetry for API gateways. Cut integration failures 20% through API standards and playbooks.

Software Engineer -- Telco Platform (2014-2018)

- Built API-based platform components (IMS Core, RCS, SIP) in production environments. Established API-first extensibility patterns for partner integrations.

Cisco Systems

Aug 2010 - Dec 2014

Software Engineer Bangalore, India

- Developed real-time streaming systems under hardware constraints. Collaborated across hardware, firmware, and application teams on production readiness.

PROJECTS & PUBLICATIONS

AnomEdge -- Edge AI Fleet Diagnostics | 2nd Place, ProductBC Build-a-thon 2026

Three-tier AI inference (deep learning, ML, expert rules). Rust, <100ms p99, 145 tests. Shipped AI product end-to-end.

CAMARA Sandbox -- Developer API Platform | Python/FastAPI

Open developer platform for carrier APIs. 3 API surfaces, 53 tests, 90s to first API call. Developer experience from onboarding to first success.

WeatherRAN -- AI Prediction Model | O-RAN xApp, Python

ML model for 5G radio optimization. 5.3% BER improvement, 332 tests. AI product design from data sourcing through evaluation.

realEngine.ca -- AI Content Detection | Next.js, Android

AI detection across 3 media formats. <8s verdict, 2 platforms, privacy-first design.

EDUCATION

MBA (Tech & Analytics) -- UBC Sauder School of Business

2024 - 2026

Certificate, Project Management -- University of Washington

2019 - 2020

B.Tech, Computer Science -- NIT Raipur, India

2006 - 2010

CERTIFICATIONS

CSPO | CSM | PMP | KCNA (Kubernetes & Cloud Native) | AWS Certified | Terraform Associate
